PROFILE

An ambitious and adaptable Full-Stack Developer specializing in Django and React, with a versatile background in Python (AI & Automation), TypeScript, C#, and PHP. My core strength lies in translating complex requirements into clean, scalable, and highly maintainable architecture, successfully delivering diverse projects where code clarity allowed seamless team handoffs. I blend technical execution with a solid grasp of DevOps practices and Jira project management to optimize team workflows. As a natural collaborator and fast learner, my immediate goal is to secure a Junior to Mid-level position—fully open to remote roles globally or on-site in Yerevan. I bring unique cross-cultural value with my multilingual skills. My long-term ambition is to bridge the gap between development and DevOps, driving high-impact software solutions while continuously elevating my technical expertise within a forward-thinking team.

EDUCATION

Bachelor of IT 2022 - 2025
Shamsipour Technical College

PROJECTS

Mamanfateme

<https://github.com/RezaNoel/Mamanfateme>
